

Instructor

Name: Dr. Manish Kumar Jain

Bio: Dr. Manish Kumar Jain is an international corporate trainer, technical consultant, and Agentic AI consultant with more than 21 years of experience delivering enterprise learning and advisory programs across AI, data science, cloud, IoT, blockchain, and digital transformation. His Claude experience spans both foundational and advanced capabilities, including Claude 101, AI fluency, Claude Code, Claude API development, Model Context Protocol, agent skills, subagents, and deployment through Amazon Bedrock and Google Cloud Vertex AI. He applies Claude in practical business and technical contexts, helping professionals use AI assistants for software development, cybersecurity, data analysis, project management, cloud operations, training, leadership, and digital transformation. With a strong grounding in generative AI, prompt engineering, agentic workflows, and enterprise AI adoption, Dr. Jain is well positioned to help organizations translate Claude's capabilities into measurable outcomes in productivity, automation, and innovation.
